Version 03/2023

ALL PHOTOS IN THIS CATALOGUE ARE CREATED BY CHRISTIAN EPELT PHOTOGRAPHY ®

OVER 130 YEARS SWISS TRADITION & SWISS QUALITY

1888

The story of ROAMER OF SWITZERLAND, the brand of high-quality Swiss watches, begins with the ideal of its pioneering founder, Fritz Meyer (1859-1926), to create a robust yet elegant watch – a precious accessory which everyone would love to own. With this goal, he sets up his own business in Solothurn, Switzerland – a workshop with six employees producing cylinder escapements for the watch industry.

1895

Within only 7 years, the company grows to 60 employees and produces complete watches. In the same year the company develops its first own calibre and names it no. 38 to commemorate the 38th birthday of the company's founder.

1905

This year heralds one of the most significant milestones for the fledgling company: Fritz Meyer enters into a partnership with Johann Stüdeli, who is trained and experienced in the art and tradition of the watchmaker's craft. This is the start of the legendary «MST» watch movements.

1906 – 1908

The «MST» movements developed and constructed by Meyer and Stüdeli quickly acquire an excellent reputation for their high precision and reliability in and beyond Switzerland. The manufacture continues to grow and a spacious new factory to accommodate 300 workers opens its doors. ROAMER, the name of the most successful line, is registered as a trademark in Switzerland.

1923

The watch production soars to one million units a year and the company begins to produce its own cases to control the overall quality and to reduce its dependency on external suppliers.

1940

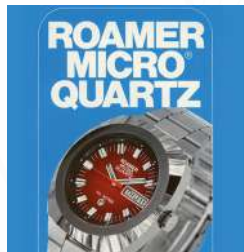

The company now employs more than 1,200 people and starts to produce its own dials. An astute case providing excellent dust and water-resistance and simplifying servicing procedures is designed, developed and patented.

1952

The company name is changed to that of its most successful brand, becoming ROAMER Watch Co. SA, under which the famous timepieces have been sold ever since.

1955

Repeatedly improved over the years, ROAMER patents a watertight watch case which induces the company to launch its Anfibio line. Anfibio gains a world-wide excellent reputation for exceptional quality, endurance and reliability.

1972

ROAMER presents its first quartz movement, the ROAMER microquartz. Some excellent ROAMER quartz diver's watches and chronographs are introduced throughout the seventies.

2003

The company reconnects with its heritage: the know-how and competence in creating its own mechanical movements reemerge with the birth of the Competence line.

2013

In 2013, ROAMER OF SWITZERLAND celebrates its 125th anniversary – as one of the best-known and popular traditional Swiss watch brands. The strong tradition of high-end production and constant innovation has made ROAMER a brand with a renowned international standing.

2020

In 2020 ROAMER expanded their popular C-Line family with the new C-Line Automatic. Rethinking but still keeping the traditional and classic roots, is the brand's ambition.

2022

Launch of production of own MST Movements in Mendrisio
